Subthemes

- Health Workforce Dynamics: A Lifecycle Approach
- Optimizing Healthcare Delivery: Workforce Strategies and Resource Allocation
- Global Health: A Local Lens on Challenges and Solutions
- Global Perspectives on Rural Health: Lessons for LMICs
- Climate Change, Urbanization, and the Future of Rural Health

The Global Rural Health Summit is a pivotal event designed to address the pressing healthcare challenges faced by rural communities in Low-Income Middle-Income Countries (LMICs). This summit brings together academic organizations, global rural health providers, family medicine practitioners, and experts from diverse fields to foster dialogue, innovation, and action.
